

Health information with just a call or a click.

Health concerns don't follow a 9-to-5 weekday schedule. They happen in the middle of the night, during vacation or while traveling for business. Determining whether a problem requires medical attention or self-care isn't always clear.

24/7 NurseLine offers access to qualified registered nurses anytime. This allows our members to make informed decisions about the appropriate level of care and avoid unnecessary worry. It's a total health solution for your business, because making informed health care decisions can reduce time lost on the job and optimize costs of care.

AudioHealth Library

Not everyone is comfortable discussing their health concerns with someone else, and some people just want more information on a health topic. That's why we provide the AudioHealth Library, accessible by phone, with more than 400 health topics.

Web Support

24/7 NurseLine's website was designed to educate members about symptoms and treatment of many common health concerns.

24/7 NurseLine goals:

- *Help lower health care costs by providing callers with medical information to assist them in deciding which level of care to seek*
- *Help provide seamless integration with our other care management programs*
- *Help increase participant satisfaction with their health care plan*
