We feel that it is our professional responsibility to strive to be our best at all times and to maximize our efforts by ensuring that the following factors are present in our classrooms and our schools.

1. Learning is developed within the personal, physical, social, and intellectual contexts of the learner.
2. A strong educational program should provide developmental continuity.
3. The successful learner is motivated, strategic, knowledgeable, and interactive.
4. Children learn best when they have real purposes and can make connections to real life.
5. Effective learning is a combination of student exploration and teacher and mentor modeling.
6. Assessment is an ongoing and multidimensional process that is an integral part of instruction.
7. Making reading and writing connections across multiple sources and curricula facilitates meaning.
8. Literacy for the future means literacy in multiple technologies.
9. Education must respond to society's diverse population and serve all children.
10. Interactions among students, teachers, parents, and community form the network that supports learning.

7-8 ELA Rationale

The rationale for English Language Arts in the St. Charles School District is to provide a foundation for all students in the areas of reading literary and informational texts, writing, language, and speaking and listening. Through written and discussion-based analysis of texts and author's choices, students will become critical thinkers. By focusing on essential standards, students will learn the skills necessary to harness their own rhetorical voices and evaluate and select information to formulate an educated opinion. Differentiating instruction through a Standards Based Grading model ensures that each student has mastered the curriculum.

7-8 ELA Program Goals

- Apply 21st Century Skills through reading, writing, speaking, and listening
- Read and understand any text or text format
- Think critically and select the most relevant information
- Effectively communicate ideas through speaking and writing
