

SCW Enrollment 2021-2022

Date: 01/26/2021

Steps to completing the enrollment form

- Students will receive the Enrollment forms from their math teacher at SCW and will return the completed forms back to the same teacher, 2-5-21.
- Go to the google classroom for your grad year (ex. Class of 2023) All enrollment papers, enrollment book, Course Guide and videos on what to look at when completing the form specific to your grade level as well as videos from departments are accessible on the google classroom and SCW website under the guidance tab.
- Please access your Tyler SIS portal to review your academic history. This will tell you how many credits you have earned and then you can check those off from the graduation requirements listed on the back of the enrollment form. Do Not sign up to see your counselor to ask what credits you need to graduate, the video for your grade level shows how this looks on the Tyler SIS portal.
- If you are unsure of what classes to take for a specific college program, research on that college website the courses you would need to take with them, and sign up for those courses if we offer them. This will help prepare you for that college program.
- Counselors will be at a table during all lunches from Thursday January 28th through February 5th for any questions you may about completing your form.
- With 3 counselors in the building and 660 students we will try to call down those that still have questions. If you want to know about specific classes, talk to teachers and students, the ones that teach the class and have been in the class can tell you what to expect.
- All Forms are due to your math teacher by February 5th. Check google classroom or the scwwarriors.org website for all documents for enrollment.
